

Meade® CaptureView™ 2.0D F/W Update

For use with Meade's 8 x 42 2.0D CaptureView™ Integrated Binocular and Digital Camera

Introduction

The **CaptureView 2.0D F/W Update** upgrades your 8 x 42 2.0D CaptureView Integrated Binocular and Digital Camera to version 1.4 firmware. This version updates CaptureView's menus and includes the **new** Flashback feature.

Do not plug in CaptureView until told to do so. Also, see warnings below in red before updating your software.

1. Close all programs before installing.
2. Download the self-extracting file, CaptureView 2.0D_FWUpdate.exe, from Meade's website to any directory on your PC. Double-click (or run) the file. 8 files will be extracted.
3. Double-click on (or run) "setup.exe."
4. The "InstallShield Wizard" window displays. Click "Next."
5. The update program will begin installation. Three times during the installation, a window will appear advising you that the files to be installed have not passed Windows® testing to verify compatibility with Windows® XP. This testing is not required for installation, so click "Continue Anyway" and "Finish" each time they display.
6. Connect the USB cable to the computer and to CaptureView's USB Port (see Fig. 1). Your computer will recognize CaptureView as a mass storage device on your PC desktop. Close any window that may display after you plug in your CaptureView.
7. Locate the **Right** and **Left Arrow keys** (see Fig. 1). Simultaneously press the Right and Left Arrow keys until CaptureView beeps (after approximately one second). This places CaptureView in the **Update Mode**.

8. "Found New Hardware Wizard" displays. Choose the "Install the software automatically" selection (this is the default choice). Click "Next."
9. "Hardware Installation" displays. During the installation, a window will appear advising you that the files to be installed have not passed Windows testing to verify compatibility with Windows XP. This testing is not required for installation, so click "Continue Anyway" each time it displays. Click the "Finish" button when it displays.
10. Step 10 will repeat two more times—there may be a slight delay. Follow the instructions in step 10.
11. If you are using Windows XP, the message "Your new hardware is installed" displays in the bottom right-hand corner of your PC. Other versions of Windows may not display any message.
12. The files required to update your CaptureView have now been installed on your PC. Proceed with the remaining instructions to load the update into your CaptureView.

WARNING: DO NOT UNPLUG YOUR CAPTUREVIEW, TURN OFF YOUR PC OR OTHERWISE INTERRUPT THE UPDATING PROCESS AFTER YOU PRESS THE F/W UPDATE BUTTON. INTERRUPTING THE UPDATING PROCESS WILL CAUSE IRREPARABLE HARM TO YOUR CAPTUREVIEW.

13. After installation, the CaptureView 2.0D FW Update icon displays on your desktop. Double-click the CaptureView 2.0D FW icon. A window displays with three button choices:
 - F/W Update: Click to update your CaptureView's firmware to version 1.4.
 - F/W Version: Click to display your CaptureView's firmware version number.
 - Exit: Click to exit CaptureView 2.0D FW Update.
14. Choose F/W Update.

WARNING: DO NOT UNPLUG YOUR CAPTUREVIEW, TURN OFF YOUR PC OR OTHERWISE INTERRUPT THE UPDATING PROCESS AFTER YOU PRESS THE F/W UPDATE BUTTON. INTERRUPTING THE UPDATING PROCESS WILL CAUSE IRREPARABLE HARM TO YOUR CAPTUREVIEW.

15. While the firmware is updating, a progress bar displays until the firmware update is complete. When "Firmware successfully updated" displays, click "OK." The CaptureView firmware is now updated and CaptureView is no longer in the update mode.
16. If you wish to return to the update mode (e.g., to check the version number), simultaneously press the Right and Left Arrow keys under the LCD Screen again until CaptureView beeps and press the F/W Version button. It should indicate version 1.4.
17. It is now safe to unplug your CaptureView.

For instructions on the operation of the new "Flashback" feature that you have successfully added to your CaptureView, please refer to the *meade.com* web site.
