QX WIDE ANGLE EYEPIECES

SERIES 4000™

Meade's Series 4000™ QX Wide Angle is a new line of 5 element eyepieces designed and engineered for high-performance observing. They yield a super wide 70° apparent field of view with incredibly crisp image resolution and contrast. This is one of the few eyepieces sold today that can give you a 70° field of view with a consistent pinpoint edge-of-field sharpness and long eye relief. All QX Wide Angle eyepieces feature multi-layered optical coatings to maximize light transmission, and edge-blackened optics for superior image contrast. The new Meade Series 4000 QX Wide Angle eyepieces are an incredible value, delivering excellent performance at an affordable price.

Product Number	Focal Length	Barrel Size	Field of View	Elements	Blackened Edges	Coatings
07258	15mm	1.25"	70°	5	Yes	Fully multi-coated
07259	20mm	1.25"	70°	5	Yes	Fully multi-coated
