

MEADE®

Series 5000 Eyepieces

“THE ULTRA WIDE ANGLE SERIES 5000 IS THE MOST INCREDIBLE EYEPIECE I’VE EVER TESTED. PERFECTLY FLAT TO THE EDGES. OUTSTANDING LIGHT TRANSMISSION. ABSOLUTELY BREATHTAKING.”

— Dr. P. Clay Sherrod, Arkansas Sky Observatory

The right eyepiece can make or break any telescope. After all, why squint through a tiny pinhole when you can linger at a dramatic window on the universe and examine every detail? Meade Series 5000 eyepieces offer revolutionary new advances in resolution, image correction and eye relief at irresistible prices. You simply won't believe how a premium eyepiece improves your view, no matter what scope you own. See pinpoint resolution edge-to-edge with luxuriously long eye relief. If you think our Series 5000 eyepieces look good on the outside, wait until you see the heavens through one.

Series 5000 5-Element Plössls have the widest apparent field of view (60°) of any Plössl on the market. The Super Wide Angle series ups the ante with an amazing-for-the-money 68° apparent field of view. Finally, our top-of-the-line Ultra Wide Angle eyepieces deliver an astounding 82° apparent field of view. For uncompromising views that make any telescope better, order a set today. You have to see the universe through one to believe it.

FEATURES

- **Wide, Super Wide, Ultra Wide fields of view**

View greater portions of the night sky at higher magnifications.

- **Premium Grade Optical Glass**

Delivers crisp, bright images and greater detail.

- **Individually tuned, multi-layered coatings**

Provides maximum light transmission.

Meade Series 5000™ eyepieces.
