

Operating Instructions

Meade® CaptureView™ Integrated Binocular and Digital Camera (Patent Pending)

WARNING! Never use a Meade® binocular to look at the Sun! Looking at or near the Sun will cause instant and irreversible damage to your eye. Eye damage is often painless, so there is no warning to the observer that damage has occurred until it is too late. Do not point the binocular at or near the Sun. Children should always have adult supervision while observing.

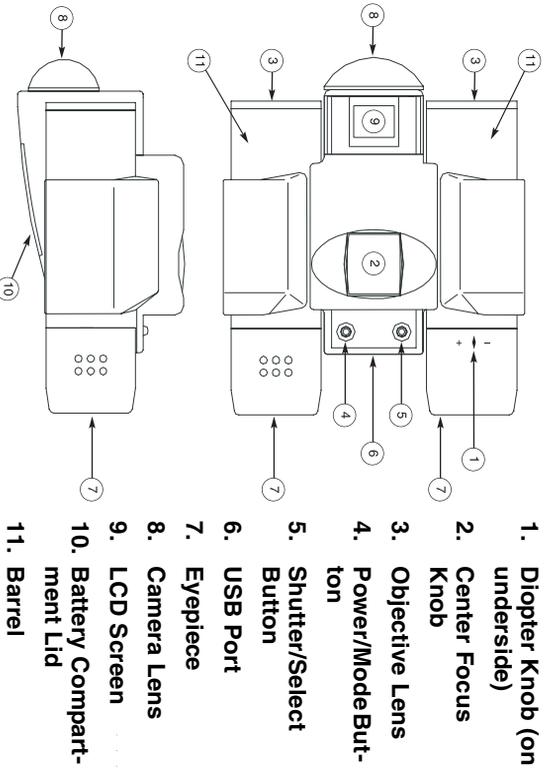

Fig. 1: CaptureView Integrated Digital Camera and Binocular.

I. Introduction

Meade *CaptureView* is an 8 x 22mm full-featured binocular integrated with a digital camera that requires no film to take pictures. **For best results, please follow these written operating instructions to capture and download pictures.**

1. Fully functional binoculars.
2. Take pictures and view them on your PC.
3. Transfer pictures to your PC for easy printing, editing, enhancing, and manipulating.
4. E-mail pictures to your friends and family.
5. LCD display panel indicates capture status for ease in selecting and performing desired operations.

Important Note:

Failure to remove batteries will result in lost pictures and dead batteries after several days of CaptureView storage. The batteries will drain even after downloading pictures and deleting them from CaptureView's memory. Please remove the batteries when not using the camera.

II. How to Use Your Binocular

To enhance your viewing enjoyment, please take a moment to familiarize yourself with your new binocular:

Adjustment of Eye Relief for Eyeglass Wearers

For best results when viewing an object while wearing eyeglasses, fold down the rubber eyecups and place them against your glasses.

Adjusting the Eyepieces

The distance between your eyes is usually different than the distance between another person's eyes. This distance is known as the interpupillary distance, or IPD. Adjustment to your IPD is important to the proper use of your *CaptureView*.

1. Hold *CaptureView* up to your face in the normal viewing position, using both hands to hold each barrel firmly.
2. Pull the barrels apart or push the barrels together until you see a single circular field with both of your eyes. (Fig. 2)

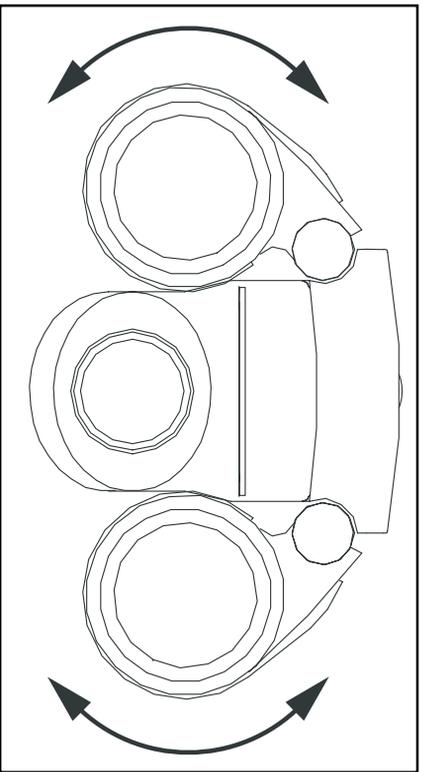

Fig. 2: Adjustment of Interpupillary Distance (IPD).

Focusing the Binocular

1. Set the Diopter Knob on underside of *CaptureView* (see 1, Fig. 1) at its center point between + and -.
2. Choose an object that is at least 16 feet (4.9m.) away.
3. Looking with just your left eye, rotate the Center Focus Knob (2, Fig. 1) until the object you are viewing is in best focus.
4. Looking with just your right eye, rotate the Diopter Knob (1, Fig. 1) until the object you are viewing is in best focus.
5. Now, looking with both eyes, with a turn of the Center Focus Knob both far and near objects can easily be brought into focus.

III. How To Use Your Camera

CaptureView performs best under good lighting conditions. It also takes some practice to get used to high-magnification photography. We suggest that you take some time to practice capturing and downloading pictures. Depending on the available light and your distance from the object, captured images may not appear as bright or centered exactly as viewed through the binoculars.

Inserting Batteries

1. Lift the battery compartment lid (10, Fig. 1) by inserting a fingernail or similar tool into the lid latch, and gently pulling to the rear and upward simultaneously.
2. Insert 2 AAA-size batteries into the compartment, noting correct polarity as illustrated inside the compartment.

Taking Pictures

1. Press the power/mode button (4, Fig. 1) to turn on the camera.
2. Select a picture resolution mode by pressing the power/mode button repeatedly to reveal the VHI screen for 640x480 high resolution mode and the LO screen for 320x240 resolution mode. Use the shutter/select button (5, Fig. 1) to select a mode; a beep will sound to confirm the selection. The mode selected will show on the LCD. See "Digital Camera Modes" for more information.
3. Sight on a target through *CaptureView*.
4. Hold *CaptureView* steady and press the shutter/select button (5, Fig. 1). A beep sounds to confirm that a picture was taken.
5. The counter in the LCD increases by one.

Self-Timer Mode

- The self-timer allows a 10 second delay before taking a picture.
1. Press the power/mode button (4, Fig. 1) to turn on the camera.
 2. Select a picture resolution mode by pressing the power/mode button repeatedly to reveal the VHI screen for 640x480 high resolution mode and the LO screen for 320x240 resolution mode. Use the shutter/select button (5, Fig. 1) to select a mode; a beep will sound to confirm the selection. The mode selected will show on the LCD. See "Digital Camera Modes" for more information.
 3. Press the power/mode button until the self-timer option displays. It will show the resolution you chose and a clock. Press the shutter/select button to select the self-timer mode. The clock and resolution now show on the LCD.
 4. Press the shutter/select button. The LCD blinks for 10 seconds.
 5. *CaptureView* beeps when the picture has been taken.
 6. The counter in the LCD increases by one.

Erasing/Deleting Pictures

Note that you can always erase the last picture using the E0 1 option or erase all the pictures using the EAL option. See "Digital Camera Modes."

When *CaptureView*'s memory is full, the LCD displays FULL and you are prevented from taking any more pictures until you have downloaded your pictures and/or erased pictures using the EAL or E0 1 options.

IV. Digital Camera Modes

Default Setting. You must be at this screen to take pictures. Your selected resolution displays (bottom left). The picture counter starts at 000 as shown. Please note that the battery life indicator (lower right) shows black shading top and bottom when receiving full power.

Resolution Options

1. High Resolution (640x480) Mode (VHI). *CaptureView* will store up to 45 images.
2. Low Resolution (320x240) Mode (LO). *CaptureView* will store up to 100 images.

Before performing any operations with *CaptureView*, select a resolution option, VHI or LO:

1. Press the power/mode button (4, Fig. 1) until the desired mode displays in the LCD.
2. Press the shutter/select button (5, Fig. 1) to select the mode.

After a resolution has been selected, you may choose the self-timer mode. Note: If you are in VHI resolution, the self-timer mode will also be in VHI resolution, etc.

Other Modes

1. Off screen. Pressing the shutter/select button shuts the camera off.

MEADE BINOCULAR/DIGITAL CAMERA LIMITED WARRANTY

Every Meade binocular/digital camera is warranted by Meade Instruments Corporation ("Meade") to be free of defects in materials and workmanship for a period of ONE YEAR from the date of original purchase in the U.S.A. and Canada. At its option, Meade will repair or replace the product, or part thereof, found upon inspection by Meade to be defective, provided the defective part or product is returned to Meade, freight prepaid, with proof of purchase. This warranty applies to the original purchaser only and is non-transferable. Meade products purchased outside North America are not included in this warranty, but are covered under separate warranties issued by Meade International Distributors.

RGAs Number Required: Prior to the return of any product or part, a Return Goods Authorization (RGA) number **must** be obtained from Meade by writing, or by calling Meade Customer Service at (800) 62-MEADE. Each returned part or product must include a written statement detailing the nature of the claimed defect, as well as the owner's name, address, and phone number.

This warranty is not valid in cases where the product has been abused or mishandled, where unauthorized repairs have been attempted or performed, or where depreciation of the product is due to normal wear-and-tear. Meade specifically disclaims special, indirect, or consequential damages or lost profit, which may result from a breach of this warranty. Any implied warranties which cannot be disclaimed are hereby limited to a term of one year from the date of original retail purchase.

This warranty gives you specific rights. You may have other rights which vary from state to state. Meade reserves the right to change product specifications or to discontinue productions without prior notice. This warranty supersedes all previous Meade binocular warranty notices.

ANY RETURN MADE IN THE U.S.A. UNDER THIS LIMITED WARRANTY MUST FOLLOW THIS PROCEDURE:

- Carefully package your binocular/digital camera to avoid shipping damage; use a thick-walled carton box for mailing.
- Enclose a written statement detailing the **exact** nature of the service needed. Be sure to include the RGA number, your name, address, plus daytime and evening telephone numbers.
- Enclose \$20.00 to cover handling and return-shipping, by check or money order payable to "Meade Instruments." Non-warranty repairs may entail additional charges which will be confirmed with you before any binocular/digital camera repairs are initiated.
- Insure the package and send your binocular/digital camera, freight prepaid, to:

2. Self-Timer Mode with 10 second delay.

3. Erase All Images Mode.

4. Erase Last Picture Mode.

5. PC Connect Mode. Not a selection. This screen only shows when **CaptureView** is connected to your PC with the supplied USB cable.

V. System Requirements

- Windows 98 / Windows Me / Windows 2000 / Windows XP.
- 200MHz (or equivalent) processor or faster.
- 64MB of SDRAM.
- Video (VGA) card with 2MB of RAM for minimum 16-bit (High Color) display.
- CD-ROM drive.
- USB port.
- 600MB of free hard drive space.

If you have questions regarding your PC system specifications, please contact your PC manufacturer.

VI. Software and Driver Installation

Place the CD (supplied bundled with your **CaptureView**) into the CD-ROM drive (see System Requirements). The start screen will come up automatically. If your PC does not autoplay CD-ROMs, click on "Demo32.exe" in the CD's directory.

Software Installation

Click on "Install Software" and follow the prompts on your screen. When the

picture download/editing program installation is complete, you will then be returned to the installation start screen.

Driver Installation

A software driver is required for your PC to recognize the **CaptureView** camera. Please install the driver before connecting the **CaptureView** to your PC.

Click on "Install Driver" on the software installation start screen and follow the prompts. The driver loaded is called ScopeCam, which is how you will find your **CaptureView** camera listed within the image download/editing program. When prompted, restart your computer.

When Windows loads, connect **CaptureView** to the computer's USB port as depicted in **Fig. 3**.

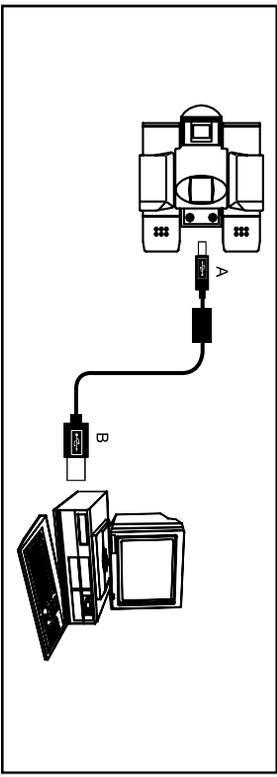

Fig. 3: Connecting CaptureView to a PC.

Important Note Regarding Device Driver Installation

Depending upon the device drivers that are already installed on your computer system, the **CaptureView** driver installation just outlined may not be recognized correctly by Windows the first time you connect the camera. If this occurs, it is easily remedied by performing the following in response to the questions Windows will ask you:

- After connecting the **CaptureView** to your PC for the first time, Windows asks you to insert the installation CD into your CD-ROM drive. Please insert the CD and click the OK button.
- Windows will tell you it needs to find some files. Windows first asks for a system file (filename.sys). Click the Browse... button.

disconnect your **CaptureView** using the procedure outlined in this section.

VII. Maintenance

Operating Environment: 41° to 104° F (5° to 40° C). 20%-85% relative humidity, non-condensing.

Care of your CaptureView

- Never immerse **CaptureView** into any fluid or liquid. Remove dust or stains with a soft cloth dampened with water or neutral detergent. Keep in a dry and cool dust-free environment or a container when it is NOT used.
- Take the batteries out when **CaptureView** is NOT to be used over a long period.
- Avoid dropping the **CaptureView**. Do not disassemble **CaptureView**.
- Download pictures to your PC before removing the batteries.

Note: After taking out the batteries, power to the **CaptureView** will be maintained for 90 seconds. Batteries must be replaced within 90 seconds to avoid loss of pictures. Be sure the **CaptureView** is off before changing the batteries.

VIII. Specifications

Binocular Power	8X
Binocular Objective Lens Diameter	22mm
Binocular Optical Design	Folding Roof Prism
Binocular Close Focus	16 ft.
Angle of View (Camera / Binocular)	8.0° / 7.0°
Binocular Field of View	400 ft. at 1000 yds.
Image Capture Resolution	640 x 480 / 320 x 240
Camera Aperture	f/5.6; Fixed Lens
Camera Optimum Range	49 ft. to Infinity
35mm Lens Equivalent	400mm
Memory	8MB SDRAM
Operating System Requirements	Windows 98/2000/Me/XP
Interface Type	USB
Weight	9.3 oz.
Product Dimensions	4.5" x 3.5" x 2.2"
Battery (user supplied)	Two AAA 1.5V Alkaline
